Dear Editor of Indonesian Journal of Geography,

I am submitting a manuscript for consideration of publication in Indonesian Journal of Geography. The manuscript is entitled “Analysis of Local Spatial Data Infrastructure to Support Tourism Village Development in Badung Regency, Bali, Indonesia”. It has not been published elsewhere and that it has not been submitted simultaneously for publication elsewhere.

Badung Regency as leading tourism destination in Bali Island tends to have an impression of similarity between tourist attractions with one another. Therefore it is necessary to make a breakthrough to develop alternative tourist attractions, one of which is developing a tourism village. To support the development of tourism village, information technology become its main power. Geographic Information Systems (GIS) and preparation of local Spatial Data Infrastructure (SDI) become very substantial for development of tourism in Badung Regency as it also able to become role model for tourism development in Indonesia.

Thank you very much for your attention. For your consideration, I include three suggested reviewers for this manuscript as follows:
