NOTICE

Dear Readers,

We're glad to inform you that after the change in format in the last editions of *Agriculture Journal*, the change starting this issue concern with the personnels. While the dean of the faculty still retain his position, the editors are now consisted of newer, if not younger, persons. Most of these editors has just arrived from their studies abroad, so we could hope that the new persons will give fresher and more innovative ideas in the future.

Thanks are due to the past editors and management personnels. They had worked hard and provided us well. Their services were sometimes thankless, despite their diligent effort to please everybody, which, as we new editors started to understand, is not easy. But we are grateful that they were there and did splendid job.

We will try to provide you, too. To report and compile our works here in the Faculty of Agriculture, Gadjah Mada University. But it is you who will give our journal meaning. Therefore we look forward for your research reports and other writings. Let us publish them for you.
